## THEY WANT US DEAD! – Red Level Alert America

By Miss American

While we are all focusing on the coming financial collapse, as bad as that is something much more sinister is in the works. It's very subtle if you are not paying attention. But, to the *aware*, it's blatant, insidious, and just as horrific as Hitler's Germany.

There is a small group of the world's banking elite who have worked for a few hundred years with ingenious precision and unlimited money, to corral, coerce, and conquer every country of value on earth. For people who are normal and not rabidly greedy, it's hard to fathom the idea of anyone trying to get control of the *whole world*, and taking a chunk of every measure of value traded between its people. What's even harder to grasp is that they will stop at *nothing* to do it. *And I mean nothing!* Look around you! Look at the millions of people slaughtered in just the last 10 years. Their leaders may have resisted the Cabal, but many if not all of those dead people were innocents. We have actually become numb to the idea of genocide, even when it's right under our nose!!!

And we are sadly mistaken if we think we are somehow immune to the wrath of the most evil people on earth. They want us dead!

They would love nothing better than to use our own military against us by goading us into revolting. They have really upped the ante lately too. Swat teaming everyday Americans on a regular basis and making sure it's in the news, and in our face. If we finally snap, then they will have their pretext to kill us off en mass. They love the cover of war for murdering millions. Don't you think that our trick CIA could have found and destroyed Hussain or Gaddafi without dropping a single bomb? Smedley Butler was right, war *is* a racket. But I get the distinct feeling that it's just not quite as much fun for this group of psychopaths if there's not total Mad Max destruction.

If after pondering and researching these facts and events, you come to any other conclusion; you are in need of a serious wake up call. The Powers That Be (TPTB) have even carved in stone their desire to eliminate 80% plus of the population of the world.

They need a much smaller herd if they are going to be able to steer and control everyone for a One World Government, under their control. A theme emerges when you look at the big picture. They find the things that we all need to survive or use, then put their agenda in motion.

If you still want to believe your government loves you, let me count for you the ways they **don't**.

**1. ASPARTAME** (renamed AMINO SWEET or NEOTAME to thwart growing awareness)- Named commercially Equal/Sweet 'n Low, aspartame has now found its

way into 5000-6000 food products. This artificial sweetener was denied approval three times. That is, until Mr. Donald Rumsfeld was hired as the new president of the Searl Co. The company has since been sold to Monsanto. This chemical literally turns into wood alcohol in your body, by-passing the blood brain barrier. Tests show it causes brain tumors and cancer, reduces fertility, can be addictive, and cause many other serious health problems. The incidence of brain tumors and cancer has risen dramatically since it was introduced. The test monkeys were trying to tell us something. A quick read on how they make it and you'll realize why it's so toxic. Instead of a "WARNING" on food labels, most products just say 'sugar free'.

**2. GMO CROPS-** Since these crops are patented; no one really knows exactly what types of genes are spliced into their DNA. They call them terminator seeds, meaning they do not produce seeds for future planting and must be purchased by farmers every year. The original theory was to blend Monsanto's herbicide Round-Up into the gene of the plant so the crops could be sprayed with Monsanto's Round-up without killing the plant. Way back in the 1980's president G.H.W. Bush declared that if Genetically Modified crops looked like regular foods, then they *were foods*, and the government would not spend federal money on testing or researching their safety or efficacy.

It has since been a battle royal for independent scientists to show that these foods are indeed questionable as to their safety for human or animal consumption. Obvious evidence from around the world shows that farm animals, as well as mice and hamsters in laboratory tests, have a high incidence of death and deformity in second and third generation offspring, spontaneous abortion and sterility. These plants have infiltrated growing fields around the world and their derivatives are in nearly all our foods. Problems are arising in spite of the hyped 'improved crop yield'. Complete fields are collapsing, new 'super weeds' are growing, and the over spraying of pesticides and Round-up are destroying the biology of growing soil. GMO crops were never tested over the long haul, and now the very worm the farmers wanted to avoid are developing a resistance to the GM corn. Monsanto's answer? Plant up to 20% of the fields with NON-GMO to lure the worms over there! And, now they'll try splicing *two* kinds of pesticides into the corn seed. Last summer Monsanto had to pay GMO farmers to use their competitor's herbicide, since Round-up was not working anymore.

Organically grown crops are being contaminated by wind and cross pollination, and farmers are being sued for 'stealing' Monsanto's property. If they can't afford to fight the monster company, they are losing their farms and lifetime investments. Monsanto hires private thugs to secretly inspect organic farms in order to accomplish these take downs. The predatory Big Ag companies have declared war on smaller farmers and us. Scientists believe that once the distorted DNA of these plants go into our bodies, that our own DNA is invaded and that our intestines can literally become pesticide factories. Monsanto has put up vicious attacks on scientists who try to warn about GMO dangers. Recently the USDA ignored an urgent letter from a Purdue scientist about a newly discovered pathogen in GMOs, pleading with them not to approve Monsanto's new GM

alfalfa. The USDA has even defied an appeals court order not to approve it until an environmental impact study was conducted, but they approved it anyway. What ever happened to the truth that “you can’t fool mother nature”? If GMO’s are not stopped now, indigenous seeds, organic foods, age old farming methods, clean and normal healthy foods will be destroyed *forever*. Since Monsanto lobbied against their ‘Franken Foods’ being labeled, and won, *we* have become the de facto ‘environmental impact study’. There are already red warning lights flashing, but hell, who cares? Full steam ahead!

**3. COREXIT-** During the Gulf Oil Disaster, BP defied the EPA’s ‘order’ not to apply this highly toxic deadly poison into the sea water. A ‘no fly zone’ was, and still is in force, so the public will not see that the spraying continues to this day. There has been a news black out imposed on scientists, researchers, doctors who are trying to diagnose and treat the many illnesses that the Gulf residents are sick and dying from. Plants and humans are being affected far, far inland, but no one knows the extent of the damage. The Corexit has produced new and deadly bacteria, one is known as Blue Plague, but that’s where the story dead ends. Has anyone heard the numbers of the premature deaths on the Gulf Coast, compared with the normal death rates? No, I didn’t think so. Somehow the news did leak out though, that the ‘spill’ has blown open and is gushing oil again, although it’s questionable that it ever stopped. Gee, if oil drilling expert Matt Simmons was still here, maybe we could find out. He gave very good reports on TV. He died alone in his hot tub one night from what they said was a ‘heart attack’. I sure miss him.

**4. VACCINES-** Does it seem to you that every day some new vaccine pops up that we must have? Shingles? HPV? In my 33 years of working with the public on an intimate level, I’ve never known anyone who died of cervical cancer. Hmmm. Each year they guess which flu bug *might* come around, and we’re all supposed to line up. A couple years ago they said ‘oops, we were wrong, come in for another stab’ of a different brew. Two winters ago they said we were all going to die a quick horrible death if we didn’t get the ‘human, pig, bird’ flu shot. I didn’t even see anyone sick, let alone die, did you? Many got sick and died from the vaccine though. Is it any wonder the drug companies paid off congress some years ago to exempt them from any damage liability for their vaccines? We’ve all heard the horror stories about what these shots can do to people. Squalene, mercury, and lord knows what else is in these formulas, or how they are cultured. Since we aren’t told, I’m not allowed to repeat rumors here. I did read last year that 83% of the people in California who ‘contracted’ whooping cough had been vaccinated for it though. Hmmm

Unfortunately, the government has admitted that ‘some’ vaccines had cancers cells in them, that they infected thousands of children in other countries with polio, and conducted illegal experiments on people with syphilis bacteria in Alabama and Guatemala. What a good way to hurt a lot of people at once; figure out what a whole lot of people *think* they need or want, then shoot it straight into their veins. But just as people are finally wising up to the dangers of vaccines, Big Pharma pushes harder and

harder for vaccines to be mandatory for when *they* decide to create another fake pandemic or illness.

**5. FALSE PANDEMIC PANIC-** An investigation into the World Health Organization's (WHO) proclamation that the world was in a bonafide pandemic (after changing the criteria for that level 6 classification), it was discovered that there were unscrupulous and conflict of interest ties to the pharmaceutical companies. Wow! What a surprise!

And yes, what was the payoff going to be? Billions of flu shots sold. Sometimes I think they need to float a trial balloon just to see how many people are still buying their scary propaganda, inflamed and enabled by the corporate owned mainstream media.

Pharmaceutical companies, with the governments' help, have already accomplished blackmailing parents into shooting up their children with a plethora of vaccines if they want to send them to school. The Powers That Be are hell bent on finding some way to force their poisons into all of us. Keep in mind that whatever the TV is trying to sell you, whatever story they go hyperbolic over, it means one of 2 things. It is either to promote TPTB's agenda, or to divert your attention *away* from TPTB's agenda. And when they omit news that's important to your life, it's so you don't think there's an agenda at all.

**6. PHARMACEUTICAL DRUGS-** I think the number of deaths caused by prescription drugs each year is up to 200,000 if I'm not mistaken. And that's not even the mistakes. That's the number for properly prescribed meds! The drug companies trump up a crisis, like cholesterol numbers that are too high, restless legs, hyperactive kids, whatever, just when they are ready to release their shiny new pill for exactly that problem. They lie and fudge in their testing, hide the flaws in the results, push for fast track approval, and wala! Billions more pour into their coffers, while people start keeling over in droves.

By the time the FDA decides to even 'study' the issue, thousands have died. Don't you just love being the *real* test subjects for them? And you didn't even get paid to be in a clinical trial! Even if the hungry lawyers get the class action suits going, the award damages are far, far smaller than what the company has already raked in. Oh well, there's always 'collateral damage' with these things, you know? Haven't I heard those words somewhere before, like when the government is making excuses for killing 'innocent civilians' during war?

**7. FLUORIDATED CITY WATER-** This is a little trick they stole from the Hitler playbook. It's just so expensive to dispose of the waste from aluminum manufacturing, hmmm, what could we drum up as a good use for it? Never mind that it actually causes brain damage, or makes your teeth mottled and discolored, or corrodes your bones, we'll just put that skull and crossbones on the 55 gallon drums to warn people. But they'll still think it's good for them because we said so, right? Then we'll pay the dentists to agree. Gee, another thing a whole lot of people need, water! Now, one of President Obama's czars suggests adding in lithium to keep people calm, along with the other pharmaceuticals that have been found in our water supplies. No matter what we learn *after the fact* about what's been done wrong, it just continues on anyway, doesn't it? Why is that?

**8. AEROSOL SPRAYING-** Have you noticed all those pretty streams planes make in the sky over your head? I have. They can turn a clear Arizona deep blue sky cloudy, in just about an hour. Sometimes they make puff clouds that have streamers draping off of them. Cool! But maybe in a short time, you find you can't breath so well, or you find these cobweb like things on your plants, or it can look like it's snowing when it's 100 degrees! More cool! But it's a different story when you read about the testing of what's been collected in air samples, or in people's blood and saliva. Micro particles of aluminum, barium, strontium, arsenic, zinc, and too many to list other heavy metals, along with strange bacteria and fibers.

Have you ever heard of Morgellon's disease? It's where people develop moving fibers under their skin. It's one of the most horrible, unimaginable, creepy and disgusting skin ailments I've ever seen. Look it up. Dr. Clifford Carnicom has been researching aerosol spraying, otherwise known as chemtrails, for over 12 years and has discovered the Morgellons fibers in the fallen debris and in the saliva of 99% of the people he's tested.

What do you know? One more thing we *all* like, breathing the air! By the way, it's not legal for the government to experiment on us without our permission, "UNLESS it's for medical, therapeutic, pharmaceutical, agricultural, industrial purposes, or for research in general, or for protection against, or for law enforcement purposes, including riot control". (Section 1520a Chapter 32 of U.S. Code Title 50). No wonder our 'representatives' scurry like rats when approached about this subject! They must have their own special air to breathe.

**9. FDA-** How many words are the limit for regular articles? Some doctors have been known to call this the Federal Death Agency. There are countless detrimental to life additives, fillers, chemicals, artificial extenders, dyes, poison in plastic food containers, and even radiation that are just fine with the FDA for us to eat. But don't you *dare* consume organic raw milk! Oh no no no. They just won't have any of that! If you report adverse effects from one of their approved elements, you may not hear back from them for *years*. You won't even be noticed if you're already a statistic! It just depends on what made you sick. If it was something a huge corporation makes, forget it. If you got sick from a peach you bought at a local roadside stand, or some lemonade from your neighbors little girls stand down the street, well its curtains for them. They'll get 10+ years in the slammer.

Just beware while you're shopping at your favorite organic fresh food grocer. Those black Suburban cars, swat team ninja cops, and big AK-47 rifles can be quite startling.

Oh, I forgot about all the toxic chemicals that are allowed to go into our skin and hair products too. Boys and girls, don't forget to use your (cancer causing) sunscreen now.

Remember to be careful in that bad sun! P.S. Watch out for domestic home grown terrorists like John McCain and Dick Durbin, they've been trying to outlaw your vitamin and mineral diet supplements, and they just won't quit.

**10. VITAMIN SUPPLEMENT DEMONIZATION-** The Pharmaceutical companies

have a jealousy problem. They don't like all the money you've been spending on vitamins to stay healthy. It's just driving them crazy. So they got our government to sign onto some UN treaty called Codex Alimentarius. This multi country UN gig wants to judge just how little nutrition you actually need in your vitamin pills, something like what wouldn't be enough for your pet fly. Then they want to give the rights to Big Pharma to make the pills, with only slightly more milligrams at one thousand times the cost. What the heck took them so long? And to make it even better, you'll have to go to your doctor (IF you can find one after ObamaCare kicks in) for a prescription for your vitamin A, B, C, D, Etc. So now, we won't have to worry at all about maintaining good health, because our loving government will do it all for us, right? So, when all the diseases that are caused by nutritional deficiencies return, all the pharmaceutical companies will be lined up waiting to fix us.

Are you getting the picture yet? Foods that are loaded up with chemicals, pesticides and herbicides, hormones and anti-biotics to counteract e.coli and staff bacteria; severely depleted in nutrients and minerals, and shipped in from all over the world with scant oversight. Yet they want to deny us the only means we have to counteract the industrialization and over processing of our foods. The deal is to keep us very sick, slowly dying, and drain our purses dry, *before* we die. Speaking of dying, how many people are killed by vitamins each year? None, or one? From the way the FDA is reacting, and Sen. Durbin's new bill, you might think there was a holocaust in progress. Well, there is..... But it's not caused by vitamins!!

**11. EPA-**Natural gas fracking (flaming tap water). 5 year Naval war exercises on all US coasts with every horrible kind of toxin, bomb, or chemical warfare germ you can think of. They even admit this endeavor will "take" (read 'kill') up to 11 million sea mammals. Nuclear leakage and fallout. Every imaginable chemical, pesticide, and herbicide. Chemtrails. Oil spills and gushers. Aerosol spraying of deadly toxins on oceans. Ocean trash dumping by corporations. Neglected toxic Superfund sites. Overflowing spent nuclear fuel pools all over the country. Electro Magnetic Frequencies (EMF). Let's see. What am I forgetting? It doesn't matter. Anything is OK by the EPA apparently.

**12. USDA-** Let me give you a clue. All these alphabet soup agencies are head fakes. They were put in place by TPTB to make us think the government was protecting us and our country. And maybe for awhile, to get us believing in them, they were. But folks, the worm has turned. Look out. They are all there to enable the move to consolidate the elites' plan for total control over our lives!

Here's a line from a recent article: 'The USDA lied to farmers and ranchers about federal drought insurance. The government has refused to pay up during the worst drought in US history'. More farmers down the drain. The USDA is an enemy of the country. The FDA is an enemy of people. The SEC is an enemy of investors. The EPA is an enemy of the earth. I could go on if you like. Nothing is logical. Nothing makes

sense. What's love got to do with it? Nothing. TPTB are brutal, evil, and diabolical. They delight in death and destruction, and enjoy watching us suffer.

**13. FUKUSHIMA-** What is Fukushima? I think I've heard of that somewhere before. Was that the name of a country somewhere near Japan or something? Oh that's right, there was a tsunami, and I think I heard something about a nuclear power plant. Boy, that CNN just jumps from one story to the next. Things are moving so fast these days it's hard to keep up. But I think somebody from England said something about not going out in the rain, or eating green leafy vegetables. But everything must be OK now, because I haven't heard any more about it.

Nothing is more despicable than to have our government order a news black-out about what is very possibly a life extinction event of mass proportion.

**14. THE FOOD SAFETY AND MODERNIZATION ACT-** Better known as 'The End of Small Farms and Don't Bother Looking For Roadside Fruit and Vegetable Stands Act'. Those small time farmers are going to be too busy complying with new draconian paperwork and regulations to worry about the safety of their organic crops. While they are busy paying the piper, the crops will die of neglect anyway. But don't get all huffy and think you'll just grow some food of your own. The Garden Police will show up with their AK-47s, and God knows what will happen if you don't have your permit! And don't even think about sharing your extra tomatoes with the neighbor. That is against the law now. They'll work best thrown onto the compost pile for next years planting.

Our loyal representatives twisted themselves into pretzels to get this bill passed. The lame duck congress even worked till the wee hours of the morning so no one would see what they were doing on the last day they were in office. Many who may have voted 'no' had gone home to bed. They got about 6 million letters, calls, and e-mails from the suckers who voted for them, begging them not to pass this dangerous bill! But they just couldn't resist giving us a parting gift, because they couldn't resist the parting gifts *they got* for passing this disgusting bill. In case you haven't picked up on it, every new bill in this Orwellian world we live in, has a name the exact opposite of what its underlying purpose is.

**15. SMART GRID and SMART METERS-** As if electro magnetic frequencies (EMF) from cell phones, cell towers, microwave ovens, HD TVs, wi-fi signals, medical CT scans, X-rays, and airport scanners, aren't enough to fry us, we now get to have the new and improved electrical grid along with the deadly 'smart meters' that go with them. Here's another gift from TPTB money grabbers who have nothing but their own agenda in mind. Even all the corporations who are going to be bidding for a piece of the action dare not bring up the issue of safety. Not a word! This may *finally* be the wake-up call for all the people who refused to believe their government has anything but their best interests at heart. Once again, our dependence on electricity will be used to hold us hostage, and to make us comply with something that may very well kill us! Not to

mention that 'smart meters' are a complete invasion of your privacy and a way for Big Brother to keep track of your every move and even control your appliances remotely if they want. Please read up on this subject *before* they come to your town and alert your neighbors! The meters will be spewing strong pulses of microwave energy all through the environment, your home and everybody in it, then returning the signal to a receiver up to 2 miles away. Even if you didn't have one, don't worry, you'll be treated to all your neighbors signals as well, right through your walls.

Your utility's talking point will be that 'they are no more dangerous than a cell phone', or that it only pulses twice a day. Outright lies! Apparently, they haven't been keeping up on their propaganda scheme. Even the WHO is finally admitting that cell phones do cause cancer tumors! Another case of hiding the health risks for the benefit of big corporations. And, according to Dr. Bill Deagle, who has been testing the smart meter, it's been putting out 100 times the EMF of a cell phone! I wonder how long it will take to kill people who are unfortunate enough to live in multi-family dwellings, or live with a meter bank containing hundreds of meters a short distance from their home? Don't think our government knows exactly what they're doing to us? The military has studied this technology extensively! The meters have not even been approved by UL, and you need a subpoena to get safety rating records from the utility co. How would you like to die? Cooked by microwaves, or fried in a fire? The meters have been catching on fire and may have been the cause of the gas line explosion in San Diego that took 8 lives and 47 homes a few months ago. Federal "investigators" said they were not going to investigate if the meter was the cause "because the meter did not cause the explosion". They don't look for things they don't want to find.

The utility commissions and the utility companies are playing extreme hardball with people who do not want to be microwaved in their homes. If you try to 'opt out', you will pay dearly to protect your health, while they are happy to place your life on the black jack table for that first winning hand. Judging by Dr. Deagle's own testing of his smart meter, it's obvious that any test results provided by the industry claiming the meters are completely safe are fraudulent! Further, they *do* admit that there has been no long term testing, but you'll need a subpoena to see their safety data. So just like cell phones, how can they dare to make any safety claims? "The meters are within the FCC's guidelines" they say. (Another alphabet agency) I guess cell phones are too, although the radio frequency levels they put out have by law, but if you refuse them permission to install the meter, they will come back and install it anyway and say you have no choice. Or they'll threaten to turn your power off! They thought they could pass this one off by saying it will save us money, conserve energy, and save the earth!

But people are catching on to this one, and the lawsuits are already under way. (Good luck with that. How many judges do *you* trust these days?) *Act now* and get your city to ban them, *please!* And don't forget to educate your doctor. He'll need the info to treat your addled brain and confused bodily systems, if the Cabal gets their way. Every cell in our body has an electrical biology, and unless you aren't human, you *will be*

damaged. It's the modern day version of a gas chamber. The chamber this time happens to be your own home, If this isn't our line in the sand, nothing is.

**16. UNENDING WARS-** Mothers, don't let your babies grow up to be soldiers. If they make it back home, they'll never be the same. Look up Gulf War Syndrome. They are guinea pigs for every imaginable vaccine, and unwitting victims of America's own weapon of mass destruction called depleted uranium. You could also become the proud grandparents of a grandchild with 2 heads and 4 legs. It has become very obvious that our government, our military, and our country have been the subjects of a coup 'd tat. The next time someone says our sons and daughters are defending *our freedom*, remind them of the black SUVs and swat team raids on the beautiful Amish farmers, or the 630 citizen deaths by cop tasers, or the no warrant, no knock raids on homes of innocent people, or the sexual assault by the airport TSA because people just want to visit their family in another state.

I know our young people sign up out of financial desperation and perceived patriotism. Once they sign they are compelled to follow orders, but

it is now apparent to the entire world that they are not fighting for our country, but for the agenda of the cabal of elites who want to own it all, including you. ***The military standing down is our only hope for saving the country.*** We need them to defend ***us, right here at home***, from the enemies within, and the outside enemies who are fomented by our government's lies. I hate to say it, but right at this moment, our military is aiding and abetting the enemy to destroy our dreams, our freedoms, and our country. Is there not a single commander who has the guts to loudly and publicly just say NO MORE?! just been listed as carcinogens. Once again, the people who will get rich off this boondoggle will be sailing away on their yachts, while you lie in a hospital bed dying of cancer. You can bet they won't have smart meters on *their* homes!

The government has offered bribe money to the states, utilities and the utility commissions (which came *from us* in the form of 'stimulus money') to institute this program. Then we'll pay for it again 'to reimburse the utility along with a 'fair' profit', by paying much higher rates. It is NOT mandated

**17. OBAMA" CARE"-** Written by the insurance companies, it will be the perfect covert plan to eliminate all the 'useless eaters' and save the government from paying all of us pesky Baby Boomers our social security. It won't be hard, since while they are adding 30 million people into the system, 60% of the doctors we have now will be long gone. They want nothing to do with it. Everyone knows that the medical system is in melt down as we speak anyway. One of my favorite parts of this travesty is the rule that if you are 'not up to date on your vaccines', you won't get care. It's such a fabulous law that the scum who voted for it made themselves and their staff exempt from it! Make your doctor appointments now! It may be a few years wait. Ask him if he makes house calls to jails, since that's where you'll be if you can't afford ObamaCare. By the way.... when your doctor (if he hasn't left the country) asks, by law, if you have any firearms in

your home, tell him ‘absolutely not’! Then ask him why he wants to know.

**18. WEATHER MODIFICATION**- Scientists say the technology certainly exists. I’m sure the ruling Cabal has unlimited funds to invest in it, and the Navy says they’ll own the weather by 2025. We keep having rare, deadly, ‘once every 100 years’ droughts, floods, earthquakes, temperatures, and snowfalls, so I’m really suspicious about this. I think they own the weather *now*! It seems to add up to broke farmers, food shortages and sky high prices. Our government signed on to a UN treaty that prohibits all countries from using weather weapons. So, our leaders promptly privatized the U.S. weather bureau, and created numerous front companies that carry out their plans for them anyway. It’s similar to hiring that company Blackwater in Iraq. They did such a good job for the U.S. in Iraq, and they’re so proud that they changed their name to XE, as if that makes them seem any less dark.

**19. FINANCIAL COLLAPSE/DEPRESSION**- I forget. How many people died during the 1930s depression? One of the most telling discoveries were the thousands of coffins piled up that Jessie Ventura showed on one of his TruTV shows. That show was never aired again, and was removed altogether from the TruTV website and the internet. Are the coffins for the masses of people who will starve during the new great depression? Why did the government order them? If they are there in case of a big natural disaster, wouldn’t the government just say so? Instead they removed the evidence from view. In detective terms, they call that consciousness of guilt.

Will someone please wake me up after I’m dead, and let me know if any of the psychopathic, demonic, control freak maniacs, who have gutted our country and our lives, are ever held accountable and banished from this world? I’d appreciate it. Thank You!

Please print out this article and give it to the people you care about. If they are still sleeping, but have any survival instinct left, maybe this will shake them awake. We are NOT in Kansas anymore my fellow Americans.
